

## Private Lands Forestry Referral Service:

### How it works:

If you need to hire a **Professional** but don't know one, you can request a referral from the Forestry Assistance Program. Many landowners find this service helpful because it narrows down the list of potential candidates and saves you time on the phone.

After you submit the request

- 1) The Conservation District will email the request directly to the Technical Service Providers who have expressed an interest in being on our referral list.
- 2) Technical Service Providers will express their interest in a particular job to the Conservation District.
- 3) We will then forward all responses, including available resumes and brochures for the various Technical Service Providers, to you after two weeks' time.
- 4) The Conservation District will follow-up to make sure you received assistance.

If you are interested in receiving a referral, please contact

Bryan Reitter
